[System Checking & and Code Repair]

As for today we new members observe how the old member present a weekly progress report check of the system together with Mr. Joaquin Nicholas Valderueda. The meeting went well as per team representatives shown the progress of their work, we new members also grasp what we will do in the following days of internship to help our seniors in improving and repairing any miscodes or errors in the system.

After the system checking meeting, back-end Mr. Justine Guillermo. Assigned the two of us members on what to work on, Mr. Guillermo assigned to us the repair work of recycle bins in the website because it does not store any deleted data in the Job-Portal, Me and Sir Roi Guiao scanned for possible solutions and continued to work on the matter on hand.
